

# Hearing Screenings & Aids

## OSHA Standard

What % of Americas report hearing loss in one/both ears?

16%

**Hearing loss is the third most common chronic physical condition behind arthritis and heart disease, affecting people of all ages**

Score Report

Aggregate Data for Employers

Hearing Aids & Amplifiers

### Program Overview

SHOEBOX meets the OSHA requirements of an ANSI-compliant audiometer and is used in a number of hospitals and industrial settings

The screenings provide highly accurate results. Poor scores lead to recommended hearing aids & amplifiers, depending on patient preference and cost

Those with complex issues are referred to local audiologists
