

Virtual Proctoring

Streamlined testing for remote workers

What % of the US population is not fully vaccinated?

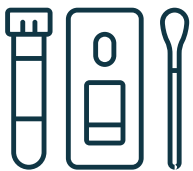

43%

Benefits

Our Covid-19 Testig Virtual Proctoring Program is a great to streamline your testing program for remote workers. Your staff can submit photos of their ID and completed test device and our digital attendants will read their results. We can also provide a fully-monitored experience where an attendant manages the process flow with the patient step by step to clinical best practices. This reduces error rates, self-reporting bias and ensures HIPAA compliant data storage ready for any audit. The solution can be paired with our vaccine declaration and contact tracing apps or installed on its own. We're excited to set you up!
