

Information Sheet: Hearing

Description

Medbar provides hearing screenings through our partnership with ShoeBox MD. SHOEBOX meets the OSHA requirements of an ANSI-compliant audiometer and is used in a number of hospitals and industrial settings. The screenings provide highly accurate results to identify hearing problems early and keep employees of all ages productive, safe and confident.

Upon detecting a hearing problem, **Medbar** will assist patients with ordering of hearing aids or amplifiers. For complex cases, a referral to a highly rated local audiologist will be sent.

Minimum participation guarantee: 24 appointments

Pace per technician: Appointment length is 10-20 minutes; 3-4 per hour per station

Indoors or Outdoors: Indoors only

Space requirements: 6 x 6 space per station; unlimited number of stations for high volume events

Lead time: 3 weeks

Comments: We can issue new hearing aids or hearing amplifiers for those who need them
